The compatible models are provided for reference only.

Whether the wheel installation is compatible, depend on the actual specification.

## Internal TPMS Sensor x2pcs

### Application:

The front and rear wheels meet the M2.5 specification, with a hole diameter of 11.5mm.

## Specifications

Working Temperature	- 40°C ~ 85°C
Working Humidity	Max 95%
RF Frequency	2.4GHz
Pressure Monitoring Range	0 ~ 116 psi
Sensor Weight	29.5 ± 3g

Note: Hex nut installation torque, 4.5 ~ 5N.m

# Before installation

## 1. Download the App

APP Version:

Support iOS 16.0 and above

Support Android 10 and above

## 2. Click "Registration"

Orange Moto TPMS

## 4. Click "OK" to enable Bluetooth connection

Orange Moto TPMS

Turn on Bluetooth

We need Bluetooth enabled on your device so we can set the product.

Cancel ok

# Getting started

1. The sensor ID is at the back of the sensor and on the packaging box. Please enter the data in sequence then click "Check sensor".

**Attention: Any changes to the settings must click "Read Sensor" to update settings.**

### Orange Moto TPMS

Nickname

License Plate

Front wheel sensor ID

Rear wheel sensor ID

Standard tire pressure setting

FW  Psi

RW  Psi

※The default value of "30", please refer to the vehicle manufacturer's recommended tire pressure value

**Read sensor**

2. Please wait a moment, and you will receive the tire pressure and tire temperature information on APP.

## System Alarm

**Abnormal tire pressure:** the tire pressure symbol, wheel position diagram, and tire pressure value will be shown in red.

**Abnormal tire temperature:** the tire pressure symbol, wheel position diagram, and tire temperature value will be shown in red.

# Add or edit vehicle information

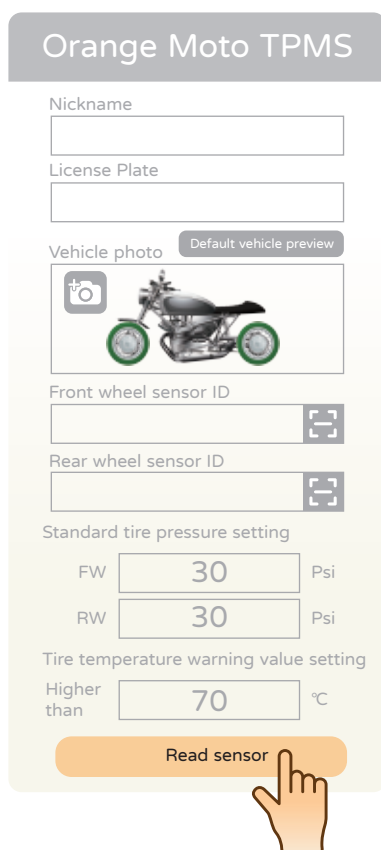

1. Select "Vehicle setting"

2. Click "+" to add vehicle, and click plate number to edit vehicle.

3. Enter the information of another vehicle in sequence and click "Check sensor". To change the displayed image of your own vehicle, click on the camera icon inside "Vehicle photo" and take a photo.

4. Please wait a moment, and you will receive the tire pressure and tire temperature information.

# Change Vehicle

1. One mobile device can be paired with multiple vehicles. Click "Change Vehicle".
2. Select the vehicle you want to change, and you can change the displayed vehicle.
