UPGRADE YOUR VOLKSWAGEN TPMS

CEO 

Quality certification: IATF16949

Orange's Electronic (Orange), in order to provide the highest quality products to consumers, we have been continuing to focus on the pursuit of quality by complying with international standards after obtaining the TS16949:2009 car factory certification.

TS16949 is compiled by the International Automotive Task Force (IATF), which is composed of well-known automobile manufacturing and trading related organizations. It specifies the technical specifications for international quality standardization. The main purpose is to unify the current automotive quality system requirements in the global automotive industry, including processing procedures of production, customer service and technical supports.

In 2016, the IATF introduced the ISO9001:2015 and announced IATF16949: a higher level of architecture that includes risk management thinking. Well-known groups such as BMW, Chrysler, Daimler, Fiat, Ford, General Motors, Renault, Flowserve, etc., are members of the IATF, and regulated by IATF16949. The later version of IATF16949 has added more detailed specifications than TS16949, and the threshold of auditing has also been raised significantly. Companies that have obtained TS16949 in the past are not necessarily can pass IATF16949 certification. By passing IATF16949 certification, Orange Electronic has shown its determination of achieving higher quality of our products as well as customer satisfaction.

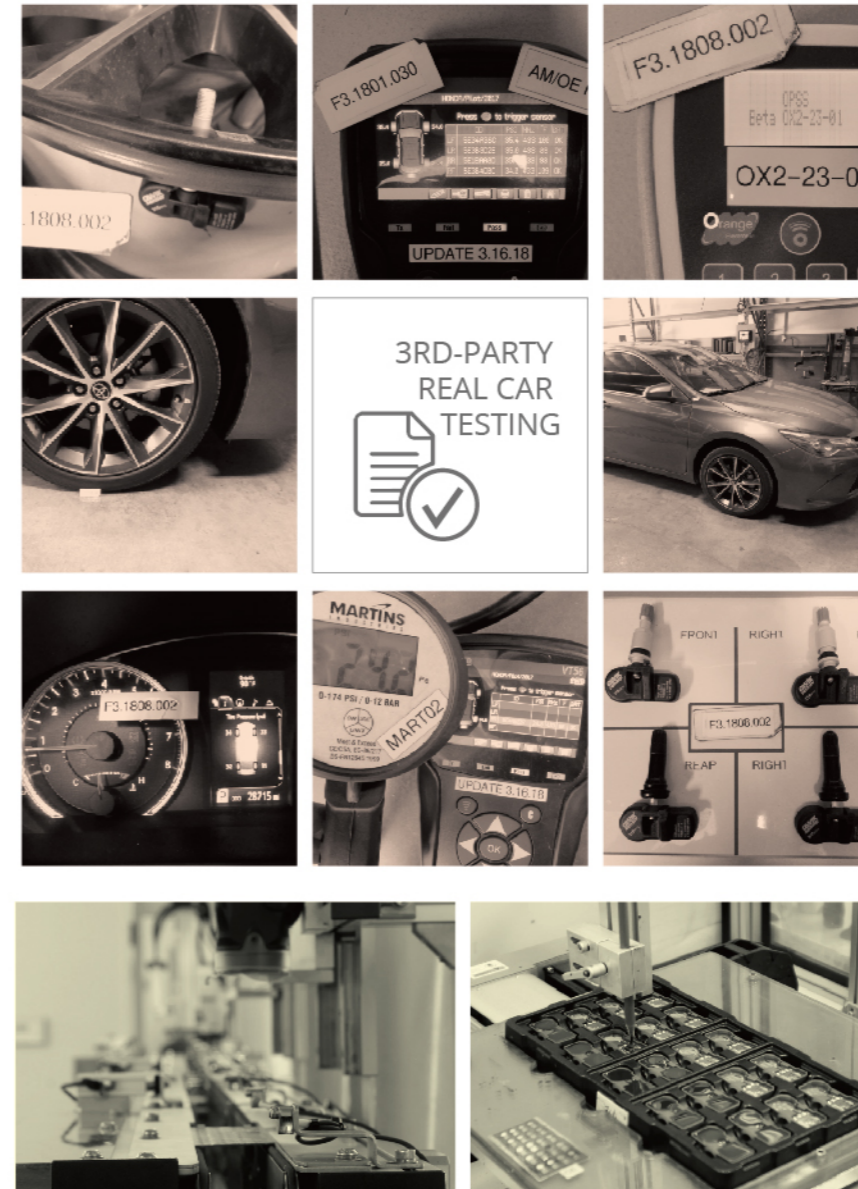

Orange's Electronic continues to improve production efficiency and process quality, reduce variability in the production process, provides after-sales service at excellent level. Orange TPMS has been highly regarded as most reliable sensors in the market with numerous verdicts from all valuable partners in person.

We are confident and proud to be part of your driving safety.

QUALITY ASSURANCE

The only third party real car testing in TPMS industry

Environmental testing using SAEJ2657 certification standards

- On-vehicle live test for 168+ hours
- Operational temperature test
- Thermal shock test
- Extreme temperature test
- Humidity test
- Frost test
- Proof pressure test
- Rapid deflation test
- Contamination test
- Salt fog test
- Drop Test
- Vehicle speed test (centrifugal force)
- Mechanical vibration test

Orange Electronic TPMS Training Session in the State of Ohio

Our partner North Gateway Tire Co., Inc. participated in Orange TPMS latest training sessions to learn the latest TPMS trend. We have been working with North Gateway for 2 years. They first started by testing our sensors at their retail location. By doing so this assured them the product was what they wanted to partner with. Their sales knowledge of TPMS continues to grow with our ongoing support.

AMERICAN TIRE DEPOT

All American Tire Depot stores across state of California and Hawaii are using Orange Electronic Simple sensor to assure your TPMS system working properly.

In our most recent trip to California we had the opportunity to complete training with our customer American Tire Depot.

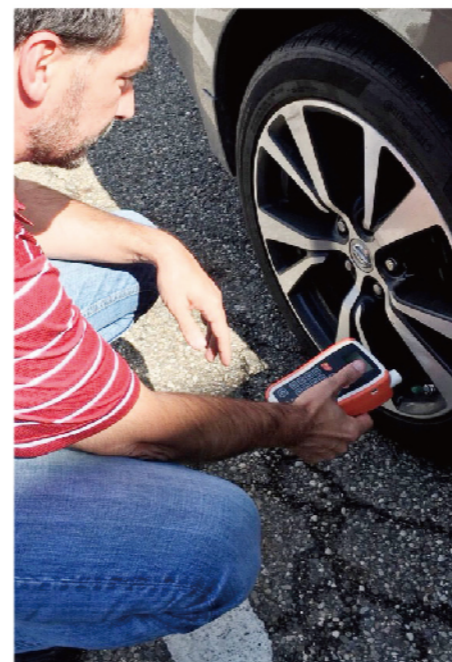

We appreciate American Tire Depot's loyalty and hard work to learn our product to implement it into your services. Orange Electronic will continue to assist and support American Tire Depot to provide the best driving experience in the safest way by assuring TPMS (tire pressure monitoring systems) are working properly.

◀ OPSSII

OE46 ▶

Before install, indirect TPMS system. Only shows TPMS icon.

- Monitoring by ABS module.
- Detecting by comparing various tire measurement.
- Less accurate; Much more complicated to service.
- No pressure by location.

UPGRADE YOUR Volkswagen

Easy to install | Integrate with OEM dashboard & media center

After install, direct TPMS system. You will know which tire is abnormal and tire pressure info.

- Immediately warning to the driver
- Detecting by dedicated TPMS sensor
- More accurate; Easier to service
- Pressure by location available

Volkswagen Direct TPMS Upgrade Kit

Are your VW/Audi/Skoda equipped with TPMS in tires?

For cost issue, OE car makers only equipped direct TPMS in some high end cars. The in-direct TPMS system in your car uses basic simulation process to calculate tire pressure range. It doesn't show exact tire pressure info, and may have false alarm issue

But in fact, your car has interface to show individual tire pressure info; it is just not been activated yet. Since your car already equipped with accurate direct TPMS system, why settle for the second best. Install it today.

Applicable car models

Make	Model	Year	Make	Model	Year
Volkswagen	Jetta MK7	2018	Audi	Q2	2016-2018
	Polo MK6(AW)	2018		TT MK3(8S)	2014-2018
